Title: Interchangeable 2-Stroke or 4-Stroke High Torque Power Engine  
CIP application No: 10/643,274  
Filing Date: 08/18/2003  
Art Unit: 3747

ATTN: Examiner KAMEN, NOAH P.

The following claims reply to your 04/28/2004 1<sup>st</sup> action. If they are not satisfactory, I request and authorize the examiner to rewrite them. My argument to the 1<sup>st</sup> action's election/restriction follows the rewritten claims on sheet 4.

I submitted 5 amendments to this application. I mailed the 5<sup>th</sup> without knowing that your action had already been mailed. They probably crossed in the mail. Claim 22 below is dependent upon claim 10 in the amendment 5. Claim 22 finds support in a correction to a flaw in the CIP written specification that follows the subsection heading **Interchanging 4-Stroke and 2-Stroke.**

If an error occurred in transferring the 5 amendments, the application held by the examiner may not agree with my saved version, which could cause misunderstanding if further proceedings are needed. Request an exact copy of the examiner's copy of the application with the 5 amendments included be mailed to me.
